Ali Rajab

Software Engineer | Product Manager | Team Leader | Web3
Engineer

Hama, Hama Governorate, Syria

Summary

Hello and welcome to my profile! أهلاً وسهلاً! About me, I'm a software engineer passionate about architecting scalable, high-impact solutions, I combine 5+ years of technical expertise with a relentless focus on performance, user experience, and clean architecture. My work spans web/mobile development (Flutter, Laravel, Next.js) and Web3 (SUI Network, Smart Contracts), with a proven track record of:

- Leading teams internationally to enhance the work flow while boosting productivity by 75%.
- Optimizing systems—cutting server load, refactoring slow components and APIs and optimizing the app security.
- Building cross-platform apps (50+ screens) and full-stack web apps with applying the best practices and choosing the (current) most efficient solutions.

I thrive in Agile environments, bridging stakeholder vision with technical execution—whether refining APIs, mentoring developers, or exploring blockchain's potential.

My goal: Let the machine automates the tasks.

Let's connect!

Experience

GBC Mobile Company

Web3 Product Manager

November 2024 - July 2025 (9 months)

Kuwait

- Deployed gas-optimized Move contracts, distributing 1,000+ tokens and 50+ NFTs to users, directly driving a 70% increase in 45-day user retention.
- Spearheaded development of a DeFi dApp for real-time analytics, swaps, and Move-based rewards, serving 2,000+ holders with 95% uptime.
- Integrated 5+ SUI-compatible wallets for seamless user onboarding, achieving 90% successful connection rates.

Codebox

Co-Founder

February 2024 - June 2025 (1 year 5 months)

Remotely contributed with a freelancer team of 3 engineer to offer IT solutions for companies and clients over the borders and successfully finished 2 internships and 2 projects:

1- <https://alsardarilaw.com>

2- <https://expert-els.com>

Freelance

Freelance Software Engineer

February 2024 - October 2024 (9 months)

United Arab Emirates, Iraq, Egypt

- Led end-to-end development of 3 interconnected mobile apps (Super App, Car Rental, Visa Agent), delivering 2 weeks ahead of schedule.
- Collaborated with a team of 2 engineers to launch a full-stack web application within 3 weeks, achieving 100% on-time delivery and 90% client satisfaction.
- Streamlined student attendance tracking by redesigning the photo capture workflow, reducing processing time from 2 minutes to 30 seconds and improving user experience by 80%.
- Tech: Next.JS, Laravel, React.js, TypeScript, MySQL, Cloudflare, GitLab, CSS3, HTML5, Linux, Agile, Flutter, Windows, SQFLite, Figma, Jira, Scrum, GoRouter, BloC, Dio

AxisX Group

Technical Project Manager

August 2023 - February 2024 (7 months)

Erbil, Erbil Governorate, Iraq

- Mentored a cross-functional team of 9 engineers in delivering features for 3 mobile apps and 1 website, driving a 75% productivity increase and 50% user base growth.

- Orchestrated efficient project management using ClickUp and streamlined Git repository management for multiple codebases, improving team collaboration and reducing feature delivery time by 80%.
- Translated stakeholder requirements into technical specs, prioritizing high-impact features that slashed customer support calls by 90% (merchants, clients, delivery personnel).
- Optimized system architecture by refactoring over 10 critical APIs, resulting in an 80% decrease in server load
- Established cost-effective solutions, including OTP implementation, generating \$1000 monthly savings while maintaining robust security standards.
- Tech: ClickUp, Flutter, Laravel, Linux, Github, CI/CD, JMeter, GetX, Google Maps, Firebase, MySQL, Figma.

Balafreen Travel and Education Services Company Ltd.
Mobile Application Engineer | Flutter | Software Architect
 December 2022 - August 2023 (9 months)
 Erbil Governorate, Iraq

- Architected and developed a cross-platform mobile app (Flutter) from the ground up, featuring 30+ screens with complex navigation and responsive UI/UX.
- Boosted data accessibility by 80% and reduced server latency by 50% through backend optimizations (AWS) and cloud infrastructure tuning.
- Processed 10,000+ rows of flight/airline data, improving app response times by 90% via efficient data modeling.
- Increased app user base by 35% by integrating social sign-in (Google, Apple, Facebook)
- Tech: Flutter, BloC, Clean Architecture, AWS, JavaScript, XCode, OAuth, Figma, Hive.

MEDIUM INSTITUTE OF COMPUTER TECHNOLOGY
Teacher Engineer
 November 2021 - March 2022 (5 months)
 Hama Governorate, Syria

- Taught 40+ second-year students in Multimedia and Programming Smart Devices courses.
- Enhanced students' knowledge of multimedia by explaining digital image structure and processing 20+ images.
- Increased students' productivity and problem-solving skills by assigning 15+ Java programming problems.

- Tech: Java, Eclipse, Adobe Photoshop

The General Electricity Company

Junior Software Engineer | System Analysis | Ionic | Laravel

November 2019 - July 2020 (9 months)

Homs, Homs Governorate, Syria

- Designed 5+ UML and ERD diagrams, reducing system architecture complexity by 30%.
- Decreased development time by 50% through efficient backend and frontend implementation in a 2-person team.
- Integrated FCM, cutting follow-up calls by 40% and boosting customer satisfaction scores by 50%.
- Tech: Ionic Framework, TypeScript, HTML5, CSS, Visual Paradigm, MySQL, Laravel, Firebase Cloud Messaging (FCM)

Education
